

WOSP Honda K-Series Guide

At WOSP we offer a variety of units in our Honda K-Series range. Like everything we produce, we want the customer to have as much choice possible so they can find the right product to suit their specific needs and requirements. Our Honda K-Series range is no exception to that. Whether its Power, Weight or Size you are going for we are certain we have something for you. Below you can find images and tables detailing the different Alternators and Starter motors we have to offer to help make your decision.

Starter Motors

At WOSP it is never 'do we do it' but 'which one to go for!' Honda K20 / K24 Starters are a perfect example of this. Excluding 4x 'less standard' examples that we manufacture for small flywheels and custom race applications the following 4 models are all suitable for standard geometry engines.

WOSP SKU	NAME	Power	Type	Weight
LMS643	Honda K20 / K24 OEM starter motor	1.2kW	Denso PMGR	3.2Kg / 7.05lbs
LMS233	Honda K20 / K24 high torque starter motor	1.4kW	Denso OSGR	3.7Kg / 8.15lbs
LMS606	Honda K20 / K24 super-duty starter motor	2.0kW	Denso OSGR	4.1Kg / 9.03lbs
LMS1345	Honda K20 / K24 high performance starter motor	2.0kW	Denso PMGR	3.8Kg / 8.38lbs
